

Internal Project Meeting Agenda – Interactive Fashion E-commerce Website

1. Opening & Meeting Objectives

- Welcome participants and confirm attendance
- Provide a brief overview of the project scope
- Clarify meeting objectives: understand the client vision, define requirements, align on tech stack, assign responsibilities, and define milestones

2. Understanding the Client's Vision & Business Goals

- Brand identity: personality, visual style, colours, typography
- Target audience and customer expectations
- Define what 'interactive experience' means (animations, try-on, previews)
- Customer journey: landing page → browsing → product page → checkout
- Review competitor or inspiration websites

3. Core Website Functional Requirements

- Product catalogue: categories, filters, attributes, inventory
- Ordering system: cart, secure checkout, payment gateway, order tracking
- User accounts: login, profiles, wishlists, order history
- Admin dashboard: product management, order management, analytics
- Mobile responsiveness and accessibility
- Security and data protection

4. Interactive Features & UX Enhancements

- Product zoom and 360° viewing
- Product videos and previews
- 'Complete the look' or outfit builder suggestions
- AI-powered product recommendations
- Customer reviews and ratings
- Live chat or AI shopping assistant
- Social media integrations
- Modern UI animations and microinteractions

5. Technical Architecture & Development Stack

- Frontend frameworks (React, Vue) and styling tools
- Backend technologies (Node.js, Laravel, etc.)
- Database structure for users, products, orders, and inventory
- Hosting, deployment, and domain configuration
- Third-party integrations: payments, email, analytics

6. Roles & Responsibilities

- UI/UX designers: wireframes, prototypes, visual design
- Frontend developers: UI implementation and responsiveness
- Backend developers: APIs, server logic, databases
- Content management: product images and descriptions
- Client communication and project updates
- Quality assurance and testing

7. Project Timeline & Milestones

- Requirements confirmation
- Wireframes and design prototypes
- Client design approval
- Frontend development
- Backend development
- Integration and testing
- User acceptance testing
- Final revisions and launch
- Post-launch support

8. Risk Assessment & Constraints

- Delays in receiving product images or content
- Payment gateway approval delays
- Scope changes during development
- Limited development resources
- Performance concerns from heavy interactive features

9. Action Items & Next Steps

- Assign responsibilities and deadlines

- Identify missing information needed from the client
- Define next deliverables
- Schedule the next internal meeting

10. Open Discussion

- Team questions or suggestions
- Final clarifications before development begins
